# NADAC UPDATE

from Cynthia Gilliland

For several years now, Hoops have been used in NADAC courses. There is a class called Hoopers which involves directing your dog through a course made up only of hoops and they are also used in several other classes: Regular, Touch N Go, Weavers, and Chances. The hoop is a ground speed obstacle which defines the dogs path. Many of our older agility dogs didn't see the point at first, but the younger ones who have encountered them in early flat work training seem to love them. NADAC is now introducing another ground speed obstacle, the barrel, which you send your dog around. This is another skill that many of us have trained our young dogs to do as part of their flat work. Barrels may be used on course in place of a tightly curved tunnel. Currently, they are optional, at the judge's and the clubs discretion, either a barrel or tunnel can be used as indicated on the approved courses. In the future they will no longer be optional.

We don't anticipate using barrels at our NOMAD trial this year, but we are hoping to make one available in the warm up area for familiarization.

## USDAA HAS A NEW CLASS—MASTERS CHALLENGE HERE IS A SAMPLE.

### BLAZE

April 28, 2001 – January 13, 2013

Adopted from Glen Highland Farm as a 2 year old, Blaze went on to earn his ATChC and ADCH titles, was 2007 AAC Steeplechase Finalist and placed in several classes at AAC Nationals over the years. But most of all, Blaze was the best companion ever – always game for anything, and with great enthusiasm for everything: Chief chicken-herder, Master of Ceremonies, and family clown; we miss you Blaze, you have left a giant hole in the pack and in our hearts.
